Summary

Experienced software craftsman and system architect with excellent communication and development skills. Strong background with mobile devices as well as multi-tier distributed system design and development.

Rapid problem analysis with the ability to work with users in developing and refining requirements. Good grasp of how each piece fits in with organization's overall goals and needs. Experienced and comfortable with agile development methods. Ability to learn and integrate new development techniques, tools, and skills quickly, soon becoming productive in the new environment.

Project Experience

iOS framework to integrate LineaPro SDK with UIWebView (2010)

Developed framework to integrate the SDK for the LineaPRO barcode and magnetic card reader with UIWebView. This allowed the client to use web developers to write iPod Touch specific webpages to access the underlying hardware without the need to write any Objective-C code.

Prototype iPhone applications for local university (2009)

Developed iPhone applications and demonstrations for local university for integration experiments between the iPhone and their backend services. Worked with them to evaluate their needs to help them create their mobile device development roadmap.

Recycling and manufacturing tracking system (2006-2010)

Primary architect and lead developer for a system to support the a major recycling business for a manufacturing client. The system is written in Java using a mixture of open source and proprietary components, using DB2 and Glassfish for the backend.

Add undo support to existing Java Swing application (2009)

Modifying an existing visual designer tool for US Air Force end users to build screens for their data warehouse. The modifications will allow them complete undo and redo functionality for their work.

DoD Humanitarian Aid and Disaster Relief planning system prototype (2006-2007)

Worked as researcher and developer on a prototype Humanitarian Aid and Disaster Relief planning system for the DoD. Developed module that allowed web users to collaboratively build, approve, and publish initial planning documents and briefings. Researched use of semantic web concepts (ontologies, OWL, Protege') in support of the process.

DARPA Software agent research prototype (2004-2005)

Designed and developed Java subsystems for a proof of concept distributed agent system: rule engine subsystem, end-user rule builder GUI, tracking subsystem, other subsystem APIs, and system utilities. Mentored team members in J2EE design, Java patterns, and refactoring. Worked with client representatives in developing roadmap for overall project.

US Navy configurable real time engine data display (2003)

Developed prototype system to provide a user configurable display system for an integrated bridge system for Navy small boats. The system monitors and displays real time data feeds from multiple engines in text or graphics mode.

November 2010

Development experience

iPhone, iPad, and iOS development	1+ years
JEE, Java Enterprise Edition design and development	11 years
Web Services design and development	5 years
Multi-tier, distributed systems design and development	15 years
Other mobile systems design and development	4 years
Overall development experience	30 years

Languages and Tools experience

Mobile: iOS, J2ME, WinCE, others
Server: WebSphere, Weblogic, Glassfish, JBoss, TIBCO
Database: Oracle, Microsoft SQL Server, DB2, MySQL, Pick/UniData
Languages: Objective-C, Java, C/C++, Delphi, others

Work Experience

Sunetos, Inc.	1998-present	Multi-tier, distributed system architect and developer
ICF International	2006-present	Software development VPT
Synergy, Inc.	1996-1998	Software design and development
Rotman & Sjoquist	1988-1996	Extensive consulting and programming in a partnership
Cedarville College	1982-1996	Various roles ending with Asst. Dir. of Computer Services
Cedarville College	1985-1994	Adjunct Instructor, computer language courses
Custom development	1980-1988	Custom software development for various businesses.

Education

B.A. Business Administration, Cedarville College, June 1982, GPA 3.5/4.0
Computer Information Systems emphasis
