

Summary

Experienced software craftsman with a strong background in iOS and distributed system design and development.

Rapid problem analysis with the ability to work with clients and end users in developing and refining requirements. Good grasp of how each piece fits in with client's overall goals and needs. Experienced and comfortable with agile development methods. Ability to learn and integrate new techniques, tools, and skills quickly. Able to mentor and assist development team members in developing their skills.

Selected Project and Speaking Experience

Personal medical incident and injury tracking app (2012)

Designing and developing app for a pharmaceutical client for their customers to document and track medically significant events related to a their medical condition. The app allows customers to interact with the client's staff medical professionals to receive advice and therapy alternatives for an event.

Add data synchronization to existing iOS app (2012)

Developed data synchronization component for a suite of apps in the medical field. Working with end client on API design, security, and system architecture.

Spoke at CocoaConf Columbus 2012

Gave a session for developers on how to build a drag and drop style application using standard iOS controls and gestures.

EAA AirVenture Conference app (2012)

SUN 'n FUN Conference app (2012)

WAI Women in Aviation Conference app (2012)

Developed family of universal apps for several aviation conferences such as the Experimental Aircraft Association's annual fly-in convention. App features include customizable personal schedule, an integrated PDF reader, multiple schedules, exhibitors, maps, and information pages, and automatic network based updates of data.

Custom Sales iPad app (2012)

Developed iPad app for enterprise deployment for a client with multiple custom, animated controls such as a circular menu and image maps with expandable hotspots.

Open Mobile iPad app (2012)

Developed iPad version of client's existing iPhone app which combines a new UI with large, existing codebase. Refactored existing codebase to better share code.

Spoke at 360iDev 2011: OCMock: Crash Test Dummies For Your Code

Gave a half-day seminar on mock objects in iOS development at 360iDev.

Spoke at CocoaConf 2011: Test Driven Development in the iOS World

Gave sessions on using TDD techniques in iOS development at CocoaConf.

Form builder component for iPad medical records app (2011)

Developed a framework to dynamically generate data entry forms based on templates downloaded from a server, allow user to enter data and submit it back to the server.

Recycling and manufacturing tracking system (2006-present)

Primary architect and lead developer for a multi-tier, distributed Java-based system to support a major recycling line of business for a manufacturing client.

DoD and DARPA projects researcher and developer (2003-2007)

Various planning and intelligent agent systems.

Adjunct Instructor for various university computer courses (1982-2006)

Douglas W. Sjoquist

Development experience

iPhone, iPad, and iOS development	3+ years
Other mobile systems design and development	5+ years
Java Desktop and Enterprise design and development	15+ years
Multitier, distributed systems design and development	25+ years
Overall professional development experience	30+ years

Selected Language and Tool experience

Mobile: iOS, Android, J2ME
Languages: Objective-C, Java, C/C++

Work Experience

Independent	1998-present	Independent software craftsman
Synergy, Inc.	1996-1998	Software design and development
Rotman & Sjoquist	1988-1996	Extensive consulting and programming in a partnership
Cedarville College	1982-1996	Various roles ending with Asst. Dir. of Computer Services Adjunct Instructor, computer language courses
Independent	1980-1988	Custom software development for various businesses.

Education

B.A. Business Administration, Cedarville College, June 1982
Computer Information Systems emphasis
