

Summary

Experienced software craftsman with a strong background in iOS and distributed system design and development.

Rapid problem analysis with the ability to work with clients and end users in developing and refining requirements. Good grasp of how each piece fits in with client's overall goals and needs. Experienced and comfortable with agile development methods. Ability to learn and integrate new techniques, tools, and skills quickly. Able to mentor and assist development team members in developing their skills.

Selected Project and Speaking Experience

Employee manual app with training videos and quizzes (2013)

Developed app for a client for their employees to review training videos, take quizzes on the material, and report results back to the office.

MyFactor – Personal medical incident and injury tracking app (2012-3)

Developing app for a pharmaceutical client for their customers to document and track medically significant events related to their medical condition. It allows customers to interact with the client's medical staff to receive advice and therapy alternatives.

MedSnap ID – Medical app for prescription and drug identification (2012-3)

Developed data synchronization and database component for a suite of apps in the medical field. Helped client design backend API for synchronization, assisted with data security and system architecture.

Spoke at CocoaConf (DC and Dallas 2013, Columbus 2012)

Gave various sessions for developers: building drag and drop style applications; automated testing techniques; and tools to manage iOS project dependencies.

SUN 'n FUN Conference app (2013)

WAI Women in Aviation Conference app (2013)

Developed conference app framework to be configurable without requiring coding changes, changed the style of the app to use slide out menus and custom submodules to handle different content types. App features include customizable personal schedule, an integrated PDF reader, multiple schedules, exhibitors, maps, and information pages, and automatic network based updates of data.

EAA AirVenture Conference app (2012)

SUN 'n FUN Conference app (2012)

WAI Women in Aviation Conference app (2012)

iLA (2012)

Developed initial version of client's iPad app for organizing notes, links, and ideas and then sharing them automatically with peers.

Custom Sales iPad app (2012)

Developed iPad app for enterprise deployment for a client with multiple custom, animated controls such as a circular menu and image maps with expandable hotspots.

Open Mobile iPad app (2012)

Developed iPad version of client's existing iPhone app which combines a new UI with large, existing codebase. Refactored existing codebase to better share code.

Form builder component for iPad medical records app (2011)

Developed a framework to dynamically generate data entry forms based on templates downloaded from a server, allow user to enter data and submit it back to the server.

Designed and developed manufacturing tracking system (Java, 2006-2012)

DoD and DARPA projects researcher and developer (2003-2007)

Adjunct Instructor for various university computer courses (1982-2006)

Douglas W. Sjoquist

Development experience

iPhone, iPad, and iOS development	4+ years
Other mobile systems design and development	5+ years
Java Desktop and Enterprise design and development	15+ years
Multi-tier, distributed systems design and development	25+ years
Overall professional development experience	30+ years

Selected Language and Tool experience

Mobile: iOS, Android, J2ME
Languages: Objective-C, Java, C/C++

Work Experience

Independent	1998-present	Independent software craftsman
Synergy, Inc.	1996-1998	Software design and development
Rotman & Sjoquist	1988-1996	Extensive consulting and programming in a partnership
Cedarville College	1982-1996	Various roles ending with Asst. Dir. of Computer Services Adjunct Instructor, computer language courses
Independent	1980-1988	Custom software development for various businesses.

Education

B.A. Business Administration, Cedarville College, June 1982
Computer Information Systems emphasis
