

Summary

Experienced software craftsman with a strong background in iOS and distributed system design and development.

Rapid problem analysis with the ability to work with clients and end users in developing and refining requirements. Good grasp of how each piece fits in with client's overall goals and needs. Experienced and comfortable with agile development methods. Ability to learn and integrate new techniques, tools, and skills quickly. Able to mentor and assist development team members in developing their skills.

Selected Project and Speaking Experience

ASDA Universal App (2014-present)

Working with the Walmart Labs team responsible for Walmart's UK subsidiary ASDAs iOS app to add new features to iPhone version, then enhancing it to be a universal app.

Conference speaking engagements 2014

D2Cincinnati: "Building a Stronger Customer Experience on Apple's Latest"

CocoaConf Columbus: "Brainstorming Creative Uses of iOS 8 Extensions"

High-End Real Estate Development Sales Tool (2014)

Developed interactive sales tool as part of client's sales and marketing campaign for a very large scale development project

Mission Control Training (2013-2014)

Developed iOS app and backend for a client's employee training business. It manages videos, assessments, and tracking and is built on Microsoft's Azure cloud services.

MyFactor – Personal medical incident and injury tracking app (2013)

Developed app for a client so their customers can track medically significant events which they can share with medical provider to receive advice and therapy alternatives.

MedSnap ID – Medical app for prescription and drug identification (2012-2013)

Developed data synchronization for a suite of medical apps. Helped client design backend API for synchronization, assisted with data security and system architecture.

Spoke at CocoaConf (DC, Dallas, Columbus 2013)

Gave various technical and project management sessions for developers.

EAA AirVenture, SUN 'n FUN, WAI Conference apps (2011-2013)

Developed conference app framework to be configurable without requiring coding changes, changed the style of the app to use slide out menus and custom submodules to handle different content types.

iLA (2012)

Developed initial version of client's iPad app for organizing notes, links, and ideas and then sharing them automatically with peers.

Custom Sales iPad app (2012)

Developed iPad app for enterprise deployment for a client with multiple custom, animated controls such as a circular menu and image maps with expandable hotspots.

Open Mobile iPad app (2012)

Developed iPad version of client's existing iPhone app which combines a new UI with large, existing codebase. Refactored existing codebase to better share code.

Form builder component for iPad medical records app (2011)

Developed a framework to dynamically generate data entry forms based on templates downloaded from a server, allow user to enter data and submit it back to the server.

Designed and developed manufacturing tracking system (Java, 2006-2012)

DoD and DARPA projects researcher and developer (2003-2007)

Adjunct Instructor for various university computer courses (1982-2006)

Douglas W. Sjoquist
