Dropbox

Dear Hiring Manager,

I am thrilled to apply for the Senior iOS Software Engineer, Mobile Collaboration position at Dropbox. As someone who thrives in dynamic environments and is passionate about iOS, this role aligns perfectly with my career aspirations to innovate and lead in the iOS development space.

As a Principal Software Engineer at Walmart, I have honed my skills in managing complex codebases and leading a team to achieve software solutions that improve efficiency and user engagement. My proficiency in Swift and iOS development has been instrumental in developing an eCommerce application that is used by millions of daily active users to improve their lives. This experience has equipped me with the capability to devise and implement solid iOS solutions that resonate well with user needs.

Among my achievements, I led a the checkout team as our tiger team rewrote the entire Walmart app from scratch starting in the late spring of 2020 and releasing to production by early fall of 2021. The new app reduced app load time by 30%, significantly simplifying the user experience while greatly enhancing user satisfaction and retention. My leadership in this project not only showcased my technical acumen but also my ability to work collaboratively with cross-functional teams, echoing Airbnb's emphasis on teamwork.

I am particularly drawn to Dropbox's vision of simplifying work collaboration through seamless technology solutions, a mission that resonates with my personal and professional values. I am a long-time user of Dropbox and am eager to contribute to this vision by leveraging my experience and skills to deliver superior mobile experiences that support Dropbox's growth and innovation goals.

Thank you for considering my application. I am enthusiastic about the opportunity to discuss how I can contribute to Dropbox's mobile engineering team further. I look forward to the possibility of connecting soon.

Kind regards,Douglas Sjoquist
